

CIDDY S. MACAPINLAC

UGC & Direct-Response Ad Video Editor · Short-Form / Long-Form Content Producer

Lapu-Lapu City, Cebu, Philippines | 0993-917-4342 | zed.maxcapinlac@gmail.com | LinkedIn: Ciddy Macapinlac

Portfolio: ciddysed.github.io/video-editor-portfolio

SUMMARY

Video editor specializing in UGC-style and direct-response ad content, creating short-form commercial videos optimized for attention, retention, and conversion. Builds hook-driven cuts and handheld, candid-style product edits, drawing on pacing and retention techniques honed producing long-form and short-form YouTube content. Uses AI tools (image generation, prompt engineering, image-to-video workflows) and an automation background (n8n, GoHighLevel, Python) to speed up production — a practical enhancer to the editing, not the main pitch.

UGC & AD VIDEO EDITING SKILLS

- UGC-style / direct-response ad editing — candid, handheld-look product and testimonial-style videos built for paid social
- Short-form hook-driven editing (first 3-second retention, pattern interrupts, caption pacing) for Reels/TikTok/Shorts-format ads
- AI-assisted production pipelines: prompt engineering for scene/shot generation, image-to-video workflows for ad and narrative content
- Storyboard-to-edit process: structuring shot sequences and visual style guides before production to keep creative consistent across variants
- Thumbnail/cover-frame design and CTR-focused packaging
- Long-form editing, scriptwriting, and narrative pacing for content requiring longer engagement

CREATIVE TOOLS

CapCut · Photoshop · Canva · ChatGPT · Claude · Google AI Studio · Nano Banana

TECHNICAL BACKGROUND

Automation & AI: GoHighLevel, n8n, Prompt Engineering (visual/video generation), Python

COMMERCIAL / UGC VIDEO PROJECT

Independent UGC Video Production | *Independent Commercial Video Project*

Recent

- Produced UGC-style promotional content for consumer product marketing (supplement ad), generating AI image prompts tuned for a handheld, candid, authentic aesthetic suited to paid social feeds.
- Built a two-step image-to-video production workflow — sourcing/generating still frames, then animating and editing them into finished short-form ad content.
- Designed shot sequences and route/scene-based visual narratives (logistics/route-style promotional video concept), planning static-image concepts before motion production.
- Edited the final cut with pacing, captions, and sound design optimized for scroll-stopping performance on paid social platforms.

CONTENT CREATION EXPERIENCE

YouTube Content Creator & Producer | *Independent Production*

Ongoing

- Manage the full YouTube production pipeline for cinematic, story-driven content — from concept and scripting through editing, packaging, and publishing.
- Write original scripts and narration, applying structured storytelling and escalation techniques to sustain viewer engagement across long-form runtimes.
- Edit long-form and short-form video content, applying deliberate pacing, hook placement, and visual rhythm to maximize audience retention and average view duration.
- Design and iterate thumbnails and titles informed by audience behavior to continuously improve discoverability and click-through performance.

PROFESSIONAL EXPERIENCE

Automation Specialist & Web Scraper (Intern) | *Metawatt – AI Innovation & Automation Platform* Jan – Apr 2026

- Engineered automated web scrapers (Python, Playwright, Selenium, BeautifulSoup) to extract structured data feeding directly into CRM workflows.
- Built multi-step GoHighLevel automation workflows and a full marketing funnel (Faithful Alliance) with lead capture, booking logic, and CRM integration.

- Extended automation beyond native platform capabilities using webhooks and third-party integrations; documented systems via structured SOPs.

PROJECTS

Cinematic YouTube Content Production System — *Production · Storytelling · Content Strategy*

- Designed and executed an end-to-end production workflow covering research, scripting, editing, thumbnail creation, and publishing — built for repeatable, high-quality output across productions.

Cinematic Visual Prompt Engine — *AI Shot-Sequence Production System*

- Designed a structured, multi-phase shot-and-scene prompt system for narrative video production, with locked style descriptors and character placeholders — the same prompt-engineering approach applied to ad and UGC content production.

GHL Lead Recovery Automation — *ciddysed.github.io/lead-recovery-portfolio*

- End-to-end CRM automation case study with a public write-up and video walkthrough demonstrating conditional branching and lead segmentation logic.

SleepSync — *Full Stack Wellness App · sleepsyncapp.netlify.app*

- Solo-built React, Spring Boot, and MySQL application; owned end-to-end product design and development from architecture through deployment.

EDUCATION & CERTIFICATIONS

BS Information Technology | *Cebu Institute of Technology – University*

2021 – 2025

Certifications: AWS Cloud Foundation · AWS Cloud Architecting · Java Programming · MySQL
